

Is The ChristoCloud™ Right For You?

More and more small businesses are discovering the benefits of working with Internet-based applications and services. Known as "The Cloud," this new trend in computing refers to the use of Internet-based software to support business processes.

As a cutting-edge technology solutions provider, Christo IT has harnessed and adapted the benefits of this new technology to provide customers with The ChristoCloud™, a private, user-friendly and secure alternative to public cloud-computing options.

Instead of maintaining cumbersome servers, multiple software licenses for multiple users, and redundant data storage and backup systems, The ChristoCloud™ helps small businesses streamline their operations and outsource an increasing number of overhead line items to a more affordable virtual network. The list of potential benefits includes:

 **Reduced Cost**

 **Increased Automation**

 **Increased Storage**

 **Added Flexibility**

 **Rapid Deployment**

 **Increased Mobility**

With The ChristoCloud™ all of your information is stored and maintained remotely on our dedicated virtual server, allowing you to work directly via a secure, high-speed Internet connection. The ChristoCloud™ provides all the advantages of a company server without the upfront investment and maintenance costs. Plus, with Christo IT as your partner, you have access to our CompleteCare™ Experience and all the IT consulting services we currently offer our clients.

The ChristoCloud™ is a perfect computing solution for companies who:

- Have 20 users or less
- Prefer an operating expense, rather than an upfront investment
- Prefer low, stable costs as opposed to fluctuating bandwidth demand charges
- Don't trust a public cloud and prefer a more secure private cloud
- Anticipate significant changes to their business in the next 12-18 months
- Have regular, stable access to the Internet
- Do not require extremely customizable email functionality*

**Email functionality can be customized with The ChristoCloud™, but some functionality requires further consultation to ensure certain unique requirements can be supported.*

Still not sure if The ChristoCloud™ is right for your business? Christo IT can help you calculate whether or not it makes financial sense to move to The Cloud or choose an in-house solution.

Schedule a customized IT evaluation to meet your small business needs at ChristoIT.com, or by calling 1.800.211.8657 to speak with one of our Trusted Engineers™ today.
